

## Sr Quality Engineer

### About this role:

Develops, establishes and maintains quality engineering methodologies, systems, and practices which meet BSC, customer, and regulatory requirements. Serves as a Quality representative to improve awareness, visibility, communication on quality initiatives to support departmental, functional, site, divisional and corporate quality goals and priorities. Provides focused quality engineering support within new product development, operational, or system/services support.

### Your Responsibilities:

- Provides leadership role on the development of risk management file deliverables. (FMEA, Hazard Analysis, etc)
- Provides leadership role on championing departmental or cross-functional engineering initiatives.
- Provides project direction, coaching, and mentoring for engineering and technical team personnel.
- Proactively investigates, identifies, and implements best-in-class Quality Engineering practices.
- Mentor for technical guidance for identifying and resolving quality issues.
- Identifies and implements effective process control systems to support the development, qualification, and on-going manufacturing of products to meet or exceed internal and external requirements.
- Leads in the implementation of assurances, process controls, and CAPA systems designed to meet or exceed internal and external requirements.
- Acts as an effective leader or team member in supporting quality disciplines, decisions, and practices.
- Applies sound, systematic problem-solving methodologies in identifying, prioritizing, communicating, and resolving quality issues.
- Assures the development and execution of streamlined business systems which effectively identify and resolve quality issues.

### What we are looking for:

#### Basic Qualifications:

- Bachelor's degree in Engineering or Quality with 5-8 years of relevant experience OR Master's degree with 3-6 years of relevant experience.
- Medical device experience
- Experience in supporting Quality related activities and leadership.
- Strong analytical skills.
- Motivated self-starter.
- Strong written and verbal communication skills.

#### Preferred Qualifications:

- Experience with supporting Verification and Validation activities.
- Problem solver with the knowledge of problem solving tools, capable of facilitating problem solving process.

CQE/CQA certification
